- **Address:** ABRII, Shahid Fahmideh Blvd, P.O. Box: 31535-1897, Karaj, Iran

2. Overview

Dr. Akram Sadeghi received her PhD in molecular genetics from Tarbiat Modares University of Iran in 2013, and currently works as Associate Prof. in the Microbial biotechnology Department of Agricultural Biotechnology Research Institute of Iran (ABRII). Her activities are focused on production of biofertilizers and biopesticides and identification of abiotic stress tolerance mechanisms in Actinomycetes. In addition, she is familiar with different technologies, such as genetic engineering, metagenomics, molecular markers, bioinformatics and functional genomics.

3. Research summary

• Performed Research

1. Study on optimum growth conditions and designing formulation for increasing viability of native *Streptomyces* isolates as biocontrol agent
2. Study of the mechanisms of salt tolerance in *Streptomyces* and their relation with biocontrol properties
3. Effect of drought stress and using *Streptomyces* bacterium on yield and yield components of maize hybrid KSC 260
4. The effect of native PGPR *Streptomyces* isolates on wheat salt tolerance
5. Isolation and molecular characterization of *Streptomyces* isolates effective on control of the fungal causal agent of sugar beet damping off and initial root rot
6. Preparation and evaluation of three products based on growth promoting bacteria on greenhouse cucumber, tomato and bell pepper (mega project)
